

Pipelines

Testing, cleaning
and disinfection services
for pipelines

Our expertise makes us the first choice when commissioning new and refurbished pipelines into service. We are unrivalled in specialist cleaning and disinfection services designed specifically for the maintenance of pipe work.

- We provide expert staff, specialist equipment and disinfection materials from bases throughout the UK
- With 15 years experience in using Chlorine or HP99 Peroxide procedures
- We are able to provide swabbing and pressure testing together with independent data logging (25mm to 2400mm)
- We have developed a range of bespoke chemical mixtures to remove pollutants including oil, diesel, and biofouling
- All of our services crews have personal training accreditation EUSR and are medically certified

EMERGENCY RESPONSE

Our 24 hour, 365 days-a-year emergency service is on hand to counter the effects of flooding, serious pollution, vandalism and terrorism
